# To Correspondents

---

I take pleasure in presenting herewith my seventh annual Catalogue and Price-List.

It has been my endeavor, to list, as much as possible, only the very best and most satisfactory of both Fruit and Ornamental Trees and Plants. Whatever I am not able to grow on my own grounds, I procure from the most reliable Nurseries. My Nursery is located between Fifth Avenue and Center Street, about four blocks northwest from West End Station, San Rafael.

I warrant all trees and plants, to be healthy, and true to label, but having no control over them, after delivery, I do not GUARANTEE them to live and thrive, nor will I replace them, except any tree or plant should prove untrue to name; but in no case will I be liable for any sum greater than the original purchase-price.

My customers are requested to notify me immediately of any error, that may have occurred in filling their order, so that the same may be rectified, as I desire to give satisfaction to all, who favor me with their order.

All orders delivered free in San Rafael and Ross Valley; a small charge for packing, to cover cost of material, will be made for all orders shipped by express or freight. All articles are at the risk of the purchaser, after being shipped.

Orders from unknown correspondents must be accompanied by cash or satisfactory reference. All bills payable first of the month.

---

## *Landscape Gardening*

Estimates for planting, remodeling old gardens, and laying out new grounds, will be cheerfully given on application.

# *Conifers*

Coniferous Trees are the grandest trees in existence. A good many of them are natives of the Pacific coast, therefore at home in our climate. Though the most expensive varieties are of rather slow growth, until well established in the ground, they will grow into the finest specimen trees for the lawn in a few years. Prices are for plants, measuring 1 to 3 feet. Quotations for larger plants on application.

# *Evergreen Trees and Shrubs*

Broadleaved Evergreens vary in size from the largest trees to the smallest shrubs; unlike the coniferous Evergreens, whose flowers are insignificant, most of these excel in brilliancy and floriferousness, others through their shining berries and foliage. These plants give our California garden, and Parks their distinctive feature.
